

1930 census ‘s.e. investigation’

Purpose

Investigate the prevalence of s.e. in the 1930 census occupational titles

Context

According to Anders and Björn “apparently, it should be short for “sin egen” that means that you are not employed, but instead run your own business.”

How common is it?

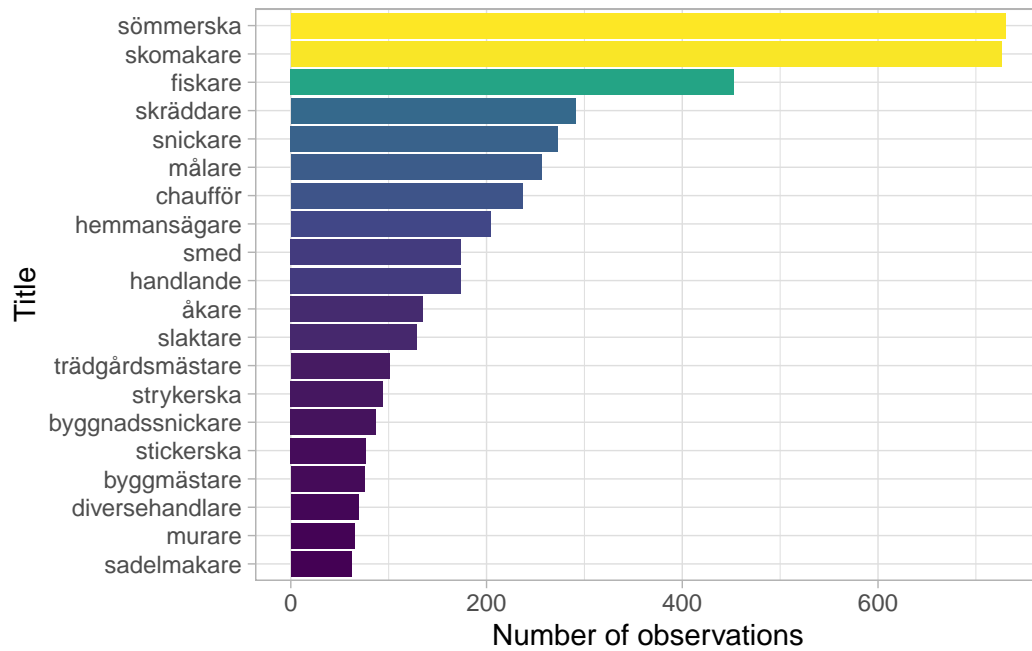

How many different ways is it written?

How common is 's.e.' in occupational titles

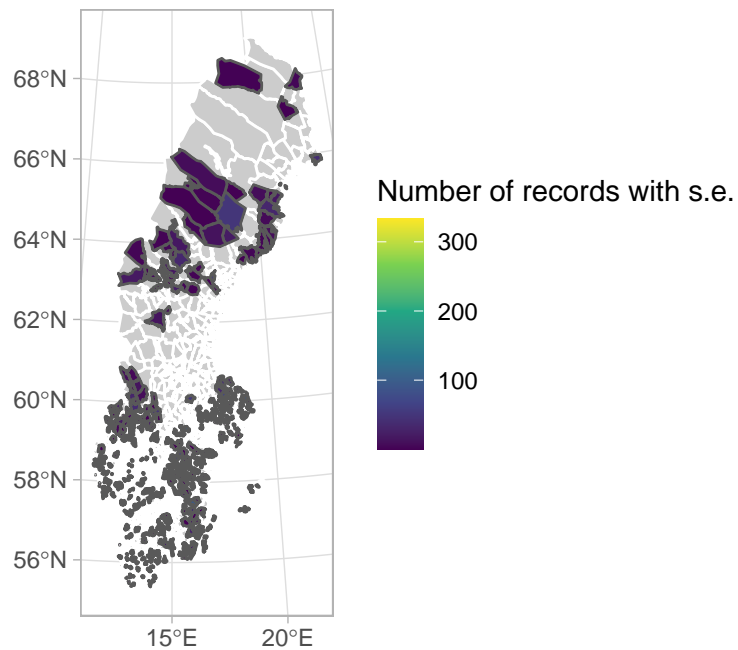

In the swedish 1930 census

Written	Number of records
se	57
se.	233
s.e.	7293

What are the most common titles for which it occurs?

Where is it common?

It doesn't seem like it any specific geographical pattern that differs from population.
